MATEMÁTICA

Redondo

Tendo em conta que o conselho de Redondo não tem uma forma geométrica conhecida na matemática, conseguimos calcular a sua área o mapa em quadrícula. Para encontrarmos uma estimativa da área do conselho:

- Transcrevemos o mapa para uma folha quadriculada com 0.5cm de lado
- Contabilizamos o número de quadrículas inteiras (543) e por aproximação juntamos porções que completassem uma quadrícula (79)
- Através da escala do mapa descobrimos que cada quadrícula corresponde na realidade a 0,5407 km² de área
- 622×0.5406 dá aproximadamente 336,3 km²

O valor obtido representa uma estimativa do valor real (369,51) km² que poderá ser melhorado se aumentarmos o rigor na contagem das
